

Trend Micro™

# WebSurf Booster

## Smart Complement to Online Transactions

Trend Micro WebSurf Booster complements your existing security software, providing an additional layer of protection for your online banking and shopping. It also stops malware attacks at both the browser and desktop levels. This smart, proven security never sleeps, guarding your PC from the latest malware threats while giving you the freedom to shop and bank online.

### KEY BENEFITS

- Tailored protection for shopping and banking online.
- Stops malware attacks at browser and desktop levels.
- Complements your existing security software.

### FEATURES

#### Keystroke Encryption

- Blocks malware from stealing your personal information through keyboard strokes
- Encrypts on a character by character basis and an independent encryption key, adding an extra layer of security
- Provides greater security with dual protection
  - Uses the strongest algorithm encryption (128-bit)
  - Bypasses the conventional keystroke delivery channel in the operating system where threats normally reside

#### WebProtect

Identifies and blocks malware attacks that come through the browser and desktop

- Identifies and blocks malware by website as well as individual web page and content levels
  - Ratings based on multiple criteria (e.g. phishing scam detection, site reputation, page reputation)
  - Correlation of over 3.5 billion URLs tested per day
- Identifies and blocks bot attacks, preventing hackers from taking control of your computer
  - Bots can secretly take control of computers, making them participate in networks called "Botnets", which then can relay spam, attack web servers, infect more computers, and perform other illicit activities.

### SYSTEM REQUIREMENTS
