

Trend Micro

Control Manager™ 5.0

Centralized Threat Management Console

Security administrators face a whole new challenge due to the sophisticated and deceptive nature of malware today. You're forced to weigh the complexity of managing geographically distributed clients and servers against the pressure to reduce time and money spent on routine administration. Today's businesses need powerful, centrally-managed security—for superior protection at a lower cost.

Trend Micro Control Manager™ gives you greater control, visibility at the client level, and more threat intelligence to optimize security throughout your enterprise. This centralized security management console streamlines management and improves security for Trend Micro solutions with customizable reports and role-based administration, plus automated updates, alerts, threat response, and license renewal. Unlike other solutions, Control Manager does not require additional client software and offers greater scalability with multi-tiered, cascading management.

KEY FEATURES

Central Console with Agent-less Operation

- Communicates with Trend Micro solutions using an integrated agent already built into the products
- Eliminates the need for additional client software—unlike solutions that require agent deployment
- Creates a truly integrated, centrally-managed security framework—for a unified defense
- Simplifies administration with automated update deployment and license renewal
- Provides single sign-on, eliminating the need to logon to each Trend Micro product

Unique Multi-tier Management*

- Provides highly scalable and flexible multi-tier, cascading model for large-scale deployments
- Distributes IT workload, allowing regional IT staff to manage local events and incidents
- Consolidates data for a master view of Control Manager servers throughout the network

NEW! Visibility into Individual Clients*

- Supports visibility into clients so central IT can remotely monitor and manage client security
- Eliminates the need to switch between several OfficeScan management consoles
- Reduces the need for deskside visits—saving time and effort

NEW! Customized, Flexible Reporting and Query*

- Enables IT administrators to easily meet internal security audit requirements
- Offers multiple levels of customization and more than 30 templates for a quick start
- Provides real-time charts and graphs for dynamic analysis of all security events
- Helps pinpoint sources of threats and identify malware patterns throughout the network
- Allows direct data queries—for immediate access to security intelligence
- Supports third-party management tools using SNMP and syslog

EXPANDED! Role-based Administration

- Ensures only authorized personnel make critical changes to the security environment
- Assigns specific privileges based on pre-defined administrative roles
- Allows user-defined customizable administrative roles

* Available only in Trend Micro Control Manager Advanced Edition

KEY BENEFITS

- **Simplifies administration** with a web-based console and integrated agent
- **Improves security** by consolidating updates and global alerts
- **Increases scalability** with unique, multi-tier management
- **Improves Intelligence** with customizable, flexible reports for easy interpretation
- **Expands visibility** into individual clients, reducing desk-side visits
- **Lowers TCO** by saving time, reducing complexity and IT workload

WHY TREND MICRO?

Leader in Threat Protection

- First to offer total web threat protection
- Top security vendor rated by CIOs¹
- #1 in spam protection according to third-party testing²
- Lowest TCO for mail server security³

¹ CIO Insight, [Vendor Value Study](#), 2006.

² Opus One, [Anti-Spam Benchmark Test](#), February 2007.

³ Osterman Research, [Mail Server TCO Study](#), January 2008.

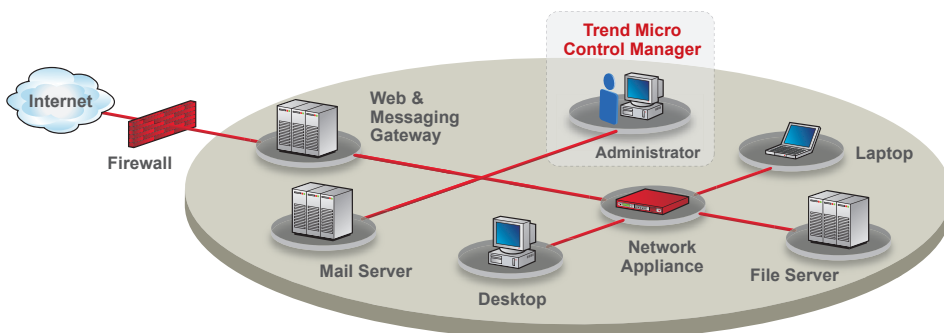

Trend Micro Control Manager™ 5.0 is available in two versions: Standard and Advanced.

- **Control Manager Standard** enables baseline centralized security management without the reporting features and multi-tiered management.
- **Control Manager Advanced** enables multi-tiered, cascading management for Trend Micro security, including customizable and flexible reporting, third-party manageability, and visibility into client-level security.

INTRALINE COMPARISON CHART				
Trend Micro Control Manager	Standard		Advanced	
	3.0	5.0	3.0	5.0
Visibility into Clients				✓
Multi-tiered Management with Cascading feature			✓	✓
Improved Role-based Administration		✓		✓
Ad-hoc Query		✓		✓
Report Templates			✓	✓
Customizable Reports				✓
License Management				✓

Trend Micro™ Enterprise-Wide Security

Trend Micro Control Manager is a key component of Trend Micro's enterprise-wide security solution, which combines multiple layers of products and services for intelligent, comprehensive protection against known and unknown threats. Tightly-integrated, centrally-managed security enables seamless inter-product collaboration to guard every network endpoint.

Trend Micro Control Manager provides a centralized threat management console to configure, monitor, and control Trend Micro software, hardware and services deployed throughout your network.

Minimum System Requirements
Server Hardware Requirements <ul style="list-style-type: none"> • Intel Pentium III - 1GHz or higher • 4GB RAM • 450MB disk space for Control Manager Standard • 500MB disk space for Control Manager Advanced • 300MB disk space for SQL2005 Express (Optional) • 20G disk space recommended as reserve for growing logs and database demands
Software Requirements <ul style="list-style-type: none"> • Operating System <ul style="list-style-type: none"> - Windows 2000 Server/Advanced Server SP3 or SP4, Windows 2003 Server Standard/Enterprise Edition R2 bare/SP1 or SP2, Windows 2003 Standard/Enterprise (WOW 64-bit) • Web Console <ul style="list-style-type: none"> - Microsoft IIS server 5.0 (for 2000 platform), IIS 6.0 (for 2003 platform) or IIS 32-bit mode (for WOW64 platform) • Database Software <ul style="list-style-type: none"> - Microsoft SQL Server 2000 SP3 or SQL Server 2005 Express SP1 or SP2, 2005 Standard (including 64-bit) SP1 or SP2, 2005 Enterprise (including 64-bit) SP1 or SP2 - Microsoft SQL Server 2005 Express Edition is included • Virtualization Support <ul style="list-style-type: none"> - VMware Virtual Infrastructure 3 (ESX 3.0)
