# InterScan™ Messaging Security Virtual Appliance Hybrid SaaS Email Security

Block inbound threats, protect outbound content, cut costs and complexity

More than 90% of all email is spam. And even your savviest employees can click on a malicious link, exposing your enterprise to cybercrime.

**Trend Micro™ InterScan™ Messaging Security Virtual Appliance**, is a hybrid SaaS email security solution that integrates proactive protection in the cloud with the privacy and control of an on-premise, virtual appliance.

In-the-cloud security reduces inbound email volumes up to 90% by blocking spam and malware outside your network. This SaaS security is integrated with the VMware Ready virtual appliance at the gateway allowing flexible control over sensitive information. And local quarantines ensure your email stays private. No email is stored in the cloud. With Trend Micro's hybrid SaaS email security you can reduce complexity and overhead to realize significant cost savings.

### Purpose-built SaaS-in-the-cloud security

- Trend Micro™ Smart Protection Network™ cloud security infrastructure stops threats before they reach your enterprise
  - Web reputation blocks access to malicious websites
  - Email reputation stops unwanted email
- Layered anti-spam composite engine provides comprehensive filtering
- Industry leading anti-malware ensures email and attachments are virus free

### On-premise VMware Ready virtual appliance

- Customizable rules for scanning inbound and outbound emails and attachments
- Flexible policies to target senders or recipients by company, group, or individual
- Supports data loss prevention, regulatory compliance and corporate governance

### HYBRID SaaS EMAIL SECURITY

#### Protection Points

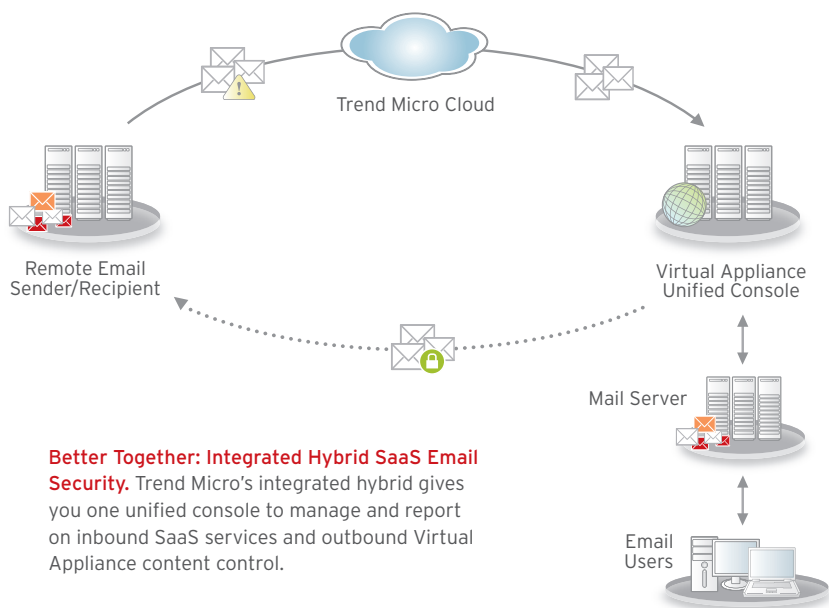

- Messaging gateway
- Internet cloud

#### Threat Protection

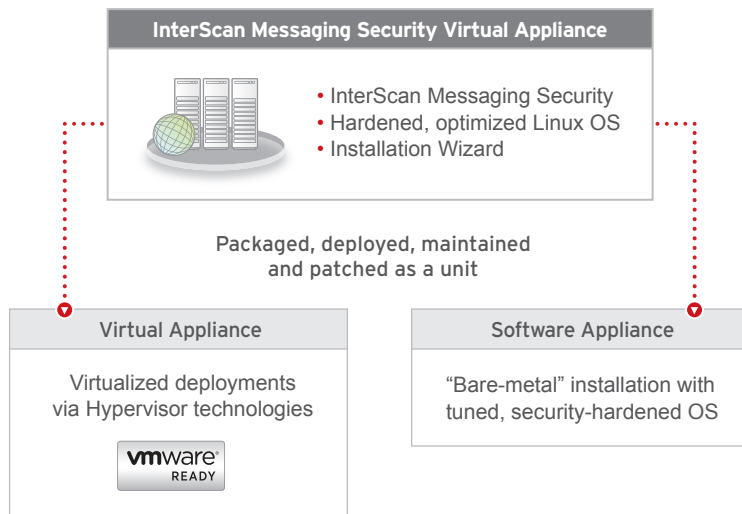

- Blended threats
- Data loss
- Inappropriate content
- Malicious web links
- Phishing
- Spam and bots
- Spyware
- Viruses

### KEY BENEFITS

- Minimizes risk with real-time, proactive protection
- Saves resources by stopping spam in the cloud, outside your network
- Protects employees from malicious links and malware
- Prevents data loss and compliance risk
- Lowers management and overall costs
- Furthers datacenter consolidation initiatives

**Better Together: Integrated Hybrid SaaS Email Security.** Trend Micro's integrated hybrid gives you one unified console to manage and report on inbound SaaS services and outbound Virtual Appliance content control.

### KEY FEATURES

#### Inbound in-the-cloud email filtering

- Lowers email volumes to your gateway by filtering all email in the cloud
- Reduces datacenter footprint and lowers staff time
- Deploys new capacity quickly where needed
- Provides Service Level Agreement for email traffic uptime

#### Real-time protection from evolving threats

- Web reputation checks embedded URLs to see if websites contain malware
- In-the-cloud threat correlation improves accuracy and responsiveness
- Email reputation blocks spam sources and rogue “fast flux” service networks
- Integrates multi-tiered antispam and reputation filtering technologies with anti-malware

#### Single management console for customization and control

- Centralized management from a single console for in the cloud and on-premise virtual appliance
- Supports customizable policies and granular, rule-based filtering with on-premise virtual appliance
- Maintains privacy and control with on-premise email quarantines
- Outbound filtering of sensitive content (encryption optional) supports compliance

MINIMUM SYSTEM REQUIREMENTS
<b>Server Platform Compatibility</b>
<ul style="list-style-type: none"> <li>• Virtual Appliances: Support VMware ESX/ESXi v3.5 and vSphere</li> <li>• Software Appliances: For the latest Certified by Trend Micro platforms, please see <a href="http://www.trendmicro.com/go/certified">www.trendmicro.com/go/certified</a></li> </ul>
<b>Minimum Hardware Requirements</b>
<ul style="list-style-type: none"> <li>• Two Intel™ Xeon processor</li> <li>• 4GB RAM</li> <li>• 120GB of disk space</li> </ul>
<b>Recommended Hardware Requirements</b>
<ul style="list-style-type: none"> <li>• Four Intel™ Xeon processor</li> <li>• 8GB RAM</li> <li>• 250GB of disk space</li> </ul>

### DEPLOYMENT OPTIONS

- **VMware Ready Validated Virtual Appliance:** Rigorously tested and validated by VMware, the only messaging gateway solution to achieve VMware Ready validation. Supports VMware ESX or ESXi v3.5 and vSphere [Learn more](#)
- **Software Appliance Platforms Certified by Trend Micro:** Through extensive testing and validation, Trend Micro certifies platforms for compatibility with Trend Micro software virtual appliance solutions. For a list, see: [Certified server platforms](#)
